

How to use a Selfie Stick

Whether it is at a game, event or just hanging out, taking selfies is always a great way to capture the moment! Using a Selfie Stick extends your reach, capturing more of what and who is around you than simply what you snap at an arm's length.

All you have to do to get started is have your smartphone or camera ready, timer set, extend your selfie and **SMILE!**

Using a Smart Phone

As you can see, the Selfie Stick comes with an adjustable phone mount. Pull the tab on the top to extend the grip. Place your phone inside. From there, simply set the timer on your phone's camera and Selfie away!

**If your phone does not have a timer, there are free camera timer apps available at your preferred app store (ex. Timercam)*

Using a Camera

As shown on the left, each Selfie Stick comes with a mount for cameras as well. As show below, almost all cameras come with a little hole that fits onto mounting screws (atop tripods, Selfie Sticks, etc). To mount your camera onto the Selfie Stick, simply match up that hole to the Selfie Stick screw and turn the screw to fasten. Set you camera timer and you are ready to selfie!
